RE: Patent Application  
"Wireless Alarm"  
Serial Number 07/540,978

Dear Anthony:

I am in receipt of your fax of earlier today. As I discussed with you, I have no record in my files suggesting that a patent application had ever been filed for the above referenced serial number.

Due to an urgent situation that has surfaced dealing with one of the inventors, I am requesting that you send me a copy of everything that you have regarding that particular serial number. Please overnight this information to my attention ASAP. If it would be easier for you to charge Axonn's Federal Express account number, please let me know.

Also, Dave had a conversation with Steve Fant, Axonn's Vice President, last week and mentioned something about being able to file documents for an "Unintentional Abandonment". Please let me know if this is an option for the above referenced matter.

As always, thanks for your help.

Sincerely,

Erin C. Pierce  
Office Manager

Re: Patent Application Files

Dear Erin:

As per our conversation today, enclosed is a copy of a Notice to File Missing Parts, mailed July 10, 1990 from the United States Patent and Trademark Office, for serial no. 07/540,978. This is the last item in our file for serial no. 07/540,978.

I prematurely gave my opinion, based on our incomplete file for this case, that this case went abandoned. According to David, Axonn Corporation took over a number of pending patent cases some time ago, so our office has no further records for any cases which Axonn Corporation took over. Therefore, the enclosed Notice of Missing Parts only provides the case information, and also that a response and fees to the U.S. Patent and Trademark Office for this case was due before September 10, 1990. I can offer no further information.

Regretfully, for all of Axonn Corporation's patent activities, I can only suggest that application serial numbers, application filing dates, attorney docket numbers, and patent numbers and patent issue dates on the various documents and letters be used to straighten out your files. Also, it is best to refrain from using the titles and names of inventors of the inventions or patent applications, as the titles and names of inventors are too indefinite to identify a specific patent
